The Modern Classroom

JW Player Media Player Tutorial

In this tutorial, we will
demonstrate how to
use the JWPlayer Media Player.

The instructions for configuring
the player will be demonstrated.
The player is extremely
lightweight and can be
further customized with add-ons,
skins and modules.

We start by downloading the JW Player.
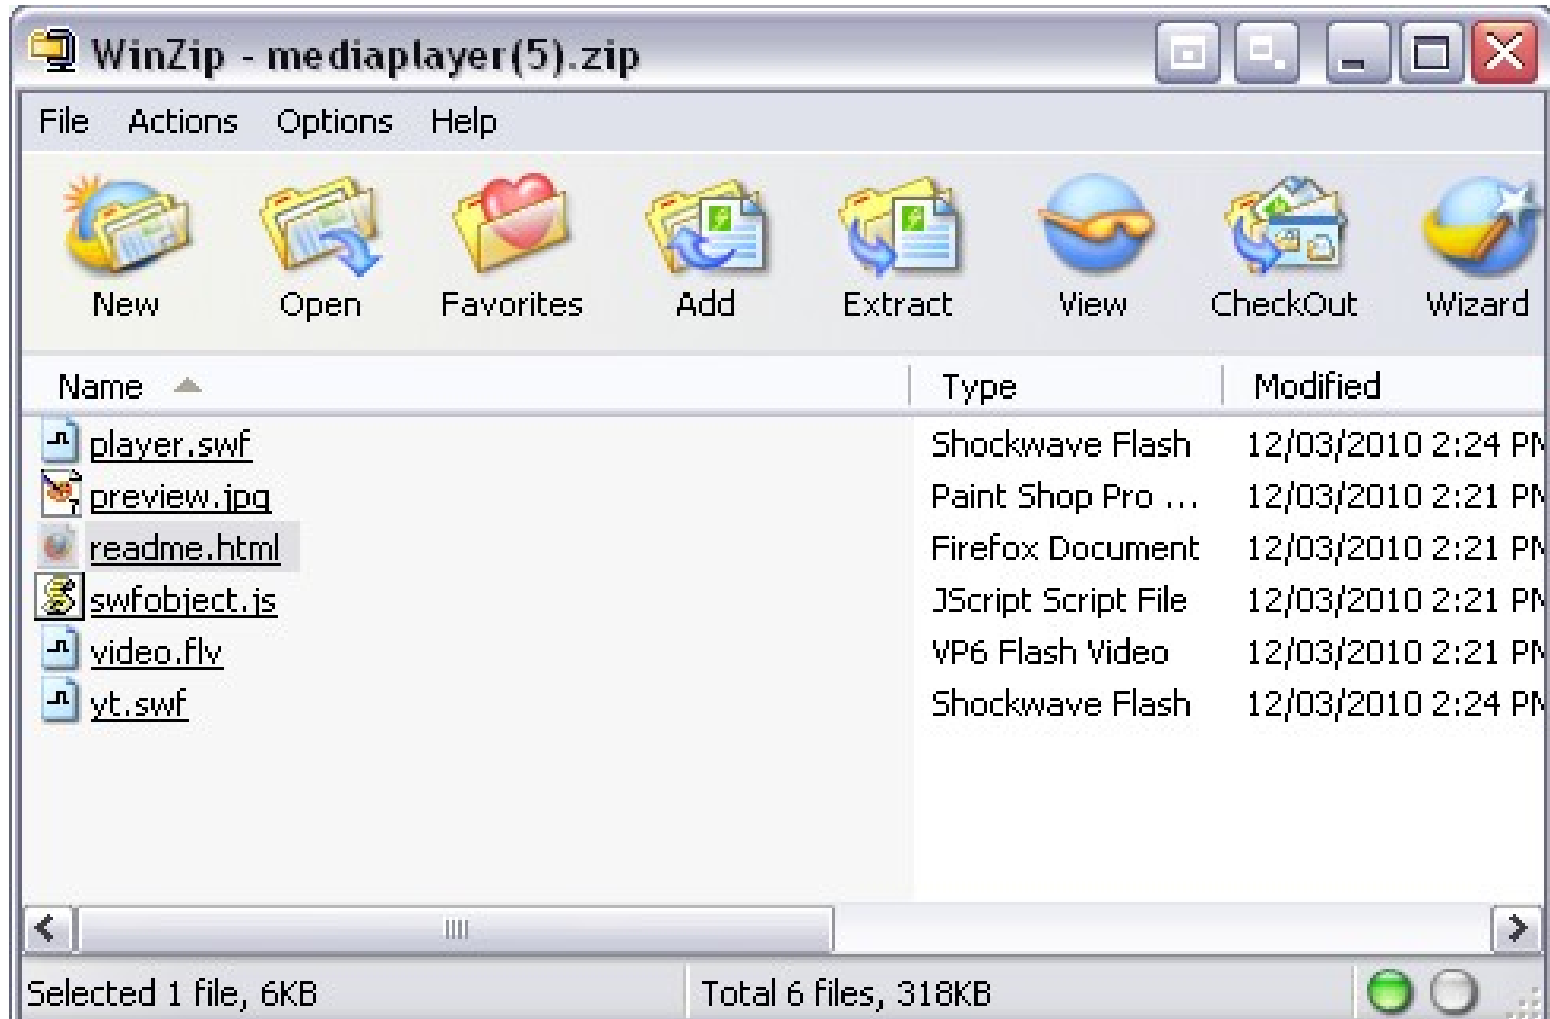

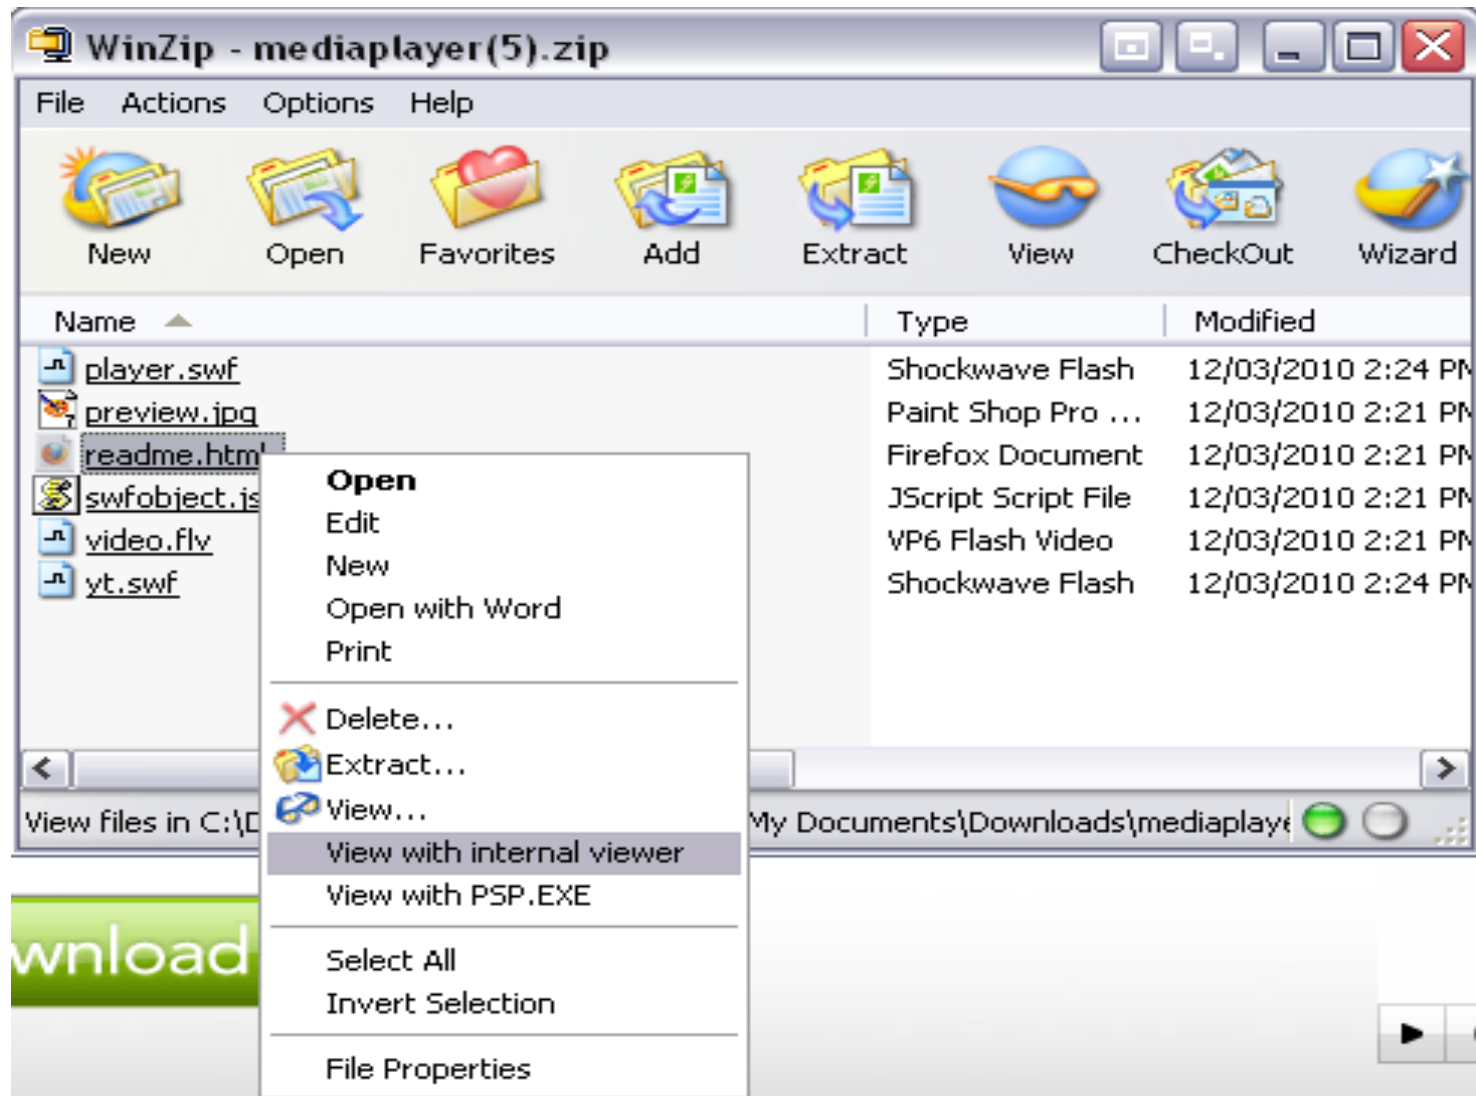

We receive a zip file,
which we open with WinZip

Highlight the "Readme.html" file

Right click on "Readme.html", then select View with Internal Viewer

Scroll down to the comment in the html file where the player embedding begins

```
<li>websites designed to promote other products, such as a band or artist;</li>
<li>products (e.g. a CMS) that bundle LongTail products into its offering. </li>
</ul>

If any of the above conditions apply to you, <a href="http://www.longtailvideo.com/players/order" title="Order co

<h3>Player Example</h3>
<p>Below you see a simple embedded example of the JW Player.  Copy and paste the source code and put the SWF, JS

<!-- START OF THE PLAYER EMBEDDING TO COPY-PASTE -->

<object id="player" classid="clsid:D27CDB6E-AE6D-11cf-96B8-444553540000" name="player" width="400" height="315">
        <param name="movie" value="player.swf" />
        <param name="allowfullscreen" value="true" />
        <param name="allowscriptaccess" value="always" />
        <param name="flashvars" value="file=video.flv&image=preview.jpg" />
        <embed
                type="application/x-shockwave-flash"
                id="player2"
                name="player2"
                src="player.swf"
                width="400"
                height="315"
                allowscriptaccess="always"
                allowfullscreen="true"
                flashvars="file=video.flv&image=preview.jpg"
        />
</object>

<!-- END OF THE PLAYER EMBEDDING -->
```
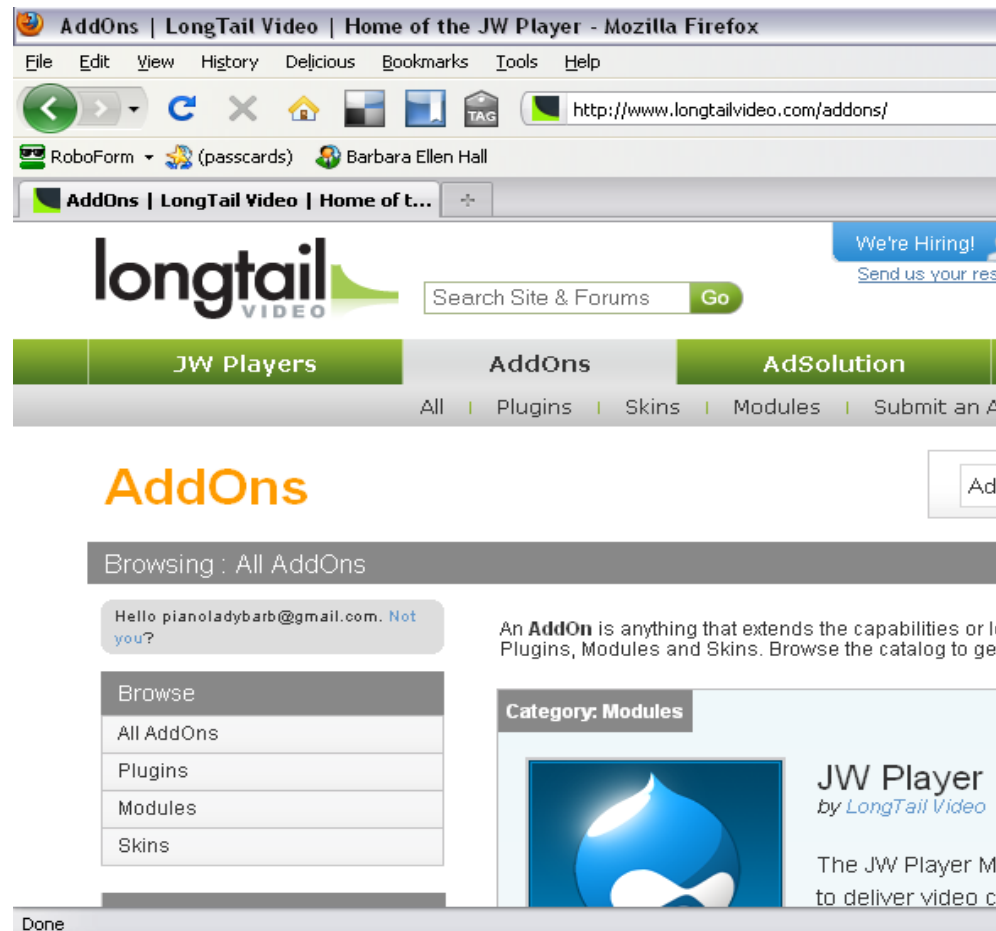

Once you've extracted the winzip file to your directory, replace "video.flv" with your own .flv file name, and "preview.png" with your own image
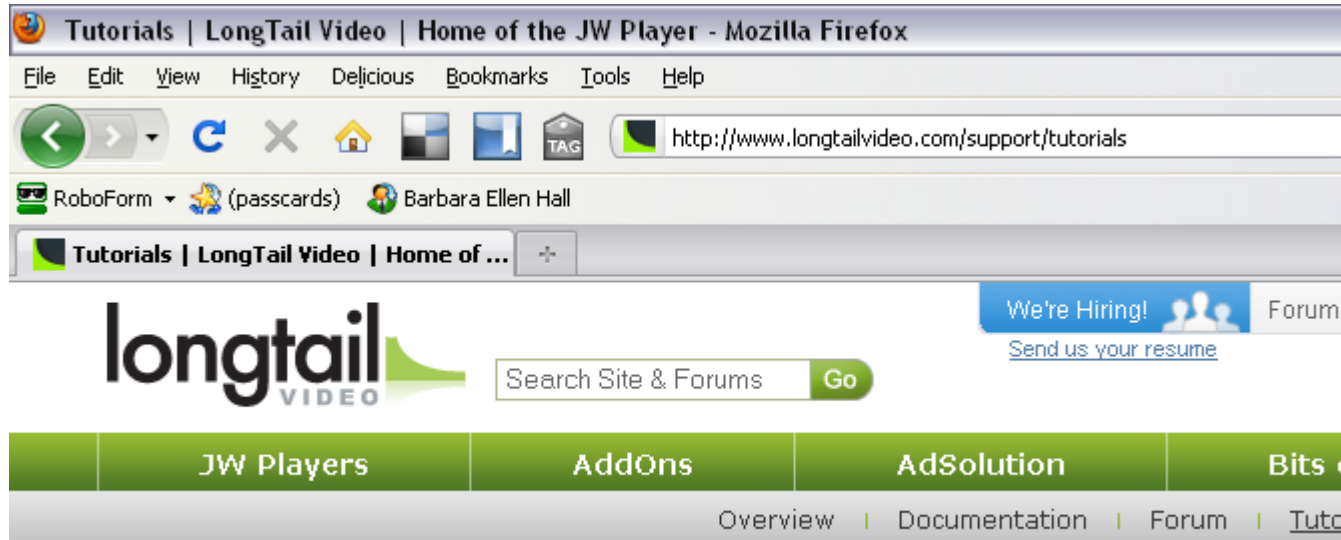

```
<li>websites designed to promote other products, such as a band or artist;</li>
<li>products (e.g. a CMS) that bundle LongTail products into its offering. </li>
</ul>

                src="player.swf"
                width="400"
                height="315"
                allowscriptaccess="always"
                allowfullscreen="true"
                flashvars="file=video.flv&image=preview.jpg"
        />
</object>

<!-- END OF THE PLAYER EMBEDDING -->
```

You can customize the look, behaviour and functionality of JW Player by downloading skins, modules and add-ons from the website. Instructions for configuring the player are included.

# Helpful tutorials, as well as a community forum are available there too.

This is how the example looks on a web page.

This concludes the JWPlayer Media Player tutorial. To download this software, please visit
